On-chain & AI tools	MITI Genesis shares	Platform NFTs, limited	Languages: EN / 中文 / KO

Contents

One site, everything in it

MITI brings fair launches, token creation, website building and everyday on-chain tools into one site. The home page is the launchpad, the toolbox sits right below, and every action is confirmed in your own wallet.

L MITI Launch Hub
Discover projects, mint by shares, auto-launch when sold out; VIP members can create their own launch projects.

T Toolbox
Batch balance, multisend, token check, Mint monitor, Market Cap Reader and more, plus one-click token, one-click website and AI Logo.

V NFT & VIP
188 limited platform NFTs: hold one and every basic tool is free. VIP unlocks project creation and unlimited use.

Site map at a glance

Where	What's there
Home	MITI Launch Hub (Discover / Create / Genesis / Mine) + Toolbox
Bottom bar (phone)	Discover • Create • Genesis • Toolbox • Mine
Top menu	Platform • Tools • Ecosystem groups, language, day/night theme, music, node settings
Notice bar	MITI Genesis progress and countdown; tap to open the Genesis page

01 • Get started

Connect a wallet & site settings

The site runs on BNB Smart Chain (BSC, chainId 56). On-chain actions need a little BNB for gas; signature-only actions cost nothing.

Option A • Connect wallet

1. **Tap "Connect wallet"**
   Open mitipad.fun, choose your wallet and confirm.
2. **Switch to BSC**
   If asked, switch the network to BNB Smart Chain.
3. **Done**
   Your short address shows at top right and every feature is available.

Option B • Binance AI Wallet QR login

1. **Tap "Get pairing QR"**
   In the connect window, under Binance AI Wallet QR login.
2. **Scan with the Binance app**
   On a phone, tap the link to open the app; match the pairing code and approve.
3. **Back to the page**
   Claim or mint MITI Genesis, bind a referrer, claim or transfer NFTs.

Option C • Agent instruction

Enter your Agent ID, paid shares and referrer, tap "Generate" then "Copy", and paste it to your AI wallet to run. For MITI Genesis.

What each option can do

Feature	Connect wallet	QR login	Instruction
MITI Genesis claim / mint	✓	✓	✓
Bind referrer • claim / transfer NFT	✓	✓	—
Launchpad, toolbox, VIP, NFT market	✓	—	—

Handy switches in the top bar

A Language
English, 中文 or Korean in one tap.

☀ Day / night
Dark by default; light theme available.

♪ Music
Several tracks; mute or hide the music button.

● Node
The dot in the top bar: auto-picks the fastest node, or pin one.

02 • MITI Genesis

MITI Genesis: how to join

MITI Genesis is project #0 on the Launch Hub and mints the platform token MITI. Opens 2026-11-18 12:00 UTC, for a 48-hour window.

500	9,500	0.003 BNB	10
Free shares • 1 per Agent ID	Paid shares	Price per paid share	Paid cap per ID • invites add more

Steps

1. **Open Genesis**
   From the notice bar, the "MITI Genesis" button on Home, or `Genesis` in the bottom bar.
2. **Connect**
   Option A, QR login or agent instruction — any one works.
3. **Enter your AI Agent ID**
   Name (e.g. abc.ai) or tokenId; the sending wallet must hold that ID.
4. **Claim 1 free share**
   Tap "Claim 1 free share" and confirm (while the 500 last).
5. **Mint paid shares**
   Pick a quantity (quick 1 / 2 / 5 / 10), check the amount, tap "Mint" and confirm.
6. **Check your record**
   The page shows your quota, shares held and mint history.

Launch rules

- When paid shares sell out, MITI **launches automatically**: BNB plus matching MITI go into PancakeSwap V2 liquidity, and the LP is sent to 0x…dEaD.
- After launch MITI trades and transfers freely; the page shows "Graduated" and the chart appears.
- If not sold out within 48 hours, minting stops and paid shares can request a refund on the page.

MITI trading tax: 3% buy / 3% sell

Goes to	Rate	How you get it
Platform NFT dividend	1.5%	Swapped to BNB, split by platform NFTs held; claim in My NFT
Holder dividend	1%	BNB to wallets holding 100,000+ MITI, by balance
Burn	0.5%	Burned, so supply keeps shrinking

03 • Invites & NFT

Invite friends, earn a platform NFT

Referrals live in the contract: a friend who binds you as referrer and mints 10 paid MITI Genesis shares counts as 1 valid address.

How to invite

1. **Copy your link**
   Open Ecosystem → Invite, connect, tap "Copy link". Format: mitipad.fun/token?r=yourAddress.
2. **Friend opens it**
   A "Confirm referrer" window appears; they check the address and tap "Confirm".
3. **Bound on chain**
   One small transaction (a little gas); it also binds automatically on a paid Genesis mint.
4. **Track it**
   The Invite page shows bound and valid counts live.

Rewards

+1 Every valid address
Your Genesis paid cap **+1 share**, no limit.

NFT Every 10 valid addresses
1 platform NFT — claim it on the Invite page after MITI launches.

Tip: each address binds once; no self-invites or mutual invites. Direct invites only.

Claim your platform NFT

1. **After MITI launches, open Invite**
   Ecosystem → Invite shows how many you can claim.
2. **Tap "Claim NFT"**
   Confirm in your wallet; see it in My NFT.

Platform NFT • 188 only

∞ All basic tools free
Unlimited, for as long as you hold it.

BNB Share MITI tax
1.5% of MITI tax, swapped to BNB, split by NFTs held.

88 Tradable
List or buy on the NFT market; 88 go to referrers, first come first served.

Every launch project also has its own **project NFT**: copy the project invite link on its page, reach the project's invite target and claim it; holders share that project's NFT dividend tax.

04 • Launch Hub

Launchpad: discover, mint, launch

Fair share-based minting: a fixed price per share, and when paid shares sell out, liquidity goes to PancakeSwap V2 automatically. Four views: Discover / Create / Genesis / Mine.

Join a project

1. **Browse Discover**
   Search, filter and sort; tabs All / Hot / New / Live / Graduated; grid or list view.
2. **Open the project page**
   See the stage (Not open → Live → Graduated), progress, price and contract links.
3. **Claim free (if offered)**
   1 free share per Agent ID when the project has a free quota.
4. **Mint paid shares**
   Pick a quantity; for USDT / MITI tap "Approve" first, then "Mint".
5. **Graduation**
   On sell-out: 98% of funds plus tokens become liquidity, LP is burned; 2% buys back and burns MITI.

Before launch, paid shares can be returned at any time; after launch the token trades freely. "Mine" on the project page shows your shares and history.

Create a launch project (VIP, free to create)

1. **Get VIP**
   See page 10.
2. **Create → Create launch project**
   Name and symbol; optional logo, website, X, Telegram and bio (written into the contract).
3. **Sale settings**
   Pay in USDT or BNB, price per share, total shares and supply; raise from 5 BNB or 3,000 USDT.
4. **Options**
   Agent ID required or not, cap per ID, free shares (0–10%), tax modules (⩽ 6% per side).
5. **Preview & create**
   Check, tap "Create project" and confirm. A project NFT is created automatically.

Tax module	What it does
Burn	Burns a share of each trade
Holder / LP-staking dividend	Split by token balance or LP held
Marketing • Project NFT • Burn dividend	To the team wallet / project NFT holders / by amount burned

05 • One-click token

One-click token, live in a minute

Create a BEP-20 token from your own wallet; the whole supply is minted straight to you. Toolbox → One-click token.

0.01 BNB
No-tax token • standard, no owner

0.03 BNB
Tax token • buy / sell ⩽ 5% each, can only go down

Steps

1. **Basics**
   Name, symbol, total supply, decimals. All supply minted to you at once; no mint function.
2. **Token avatar (optional)**
   Upload an image or use AI Logo; bind it later with a creator-wallet signature.
3. **Tax or no tax**
   No tax, or set buy / sell tax and split it across 4 destinations (total 100%).
4. **Create**
   Check the fee, tap "Create" and confirm; then "Add to wallet" in one tap.

Tax destination	Goes to
LP dividend	Split by LP held in the main pair
Marketing wallet	The address you enter
Holder dividend	Split by balance (minimum balance configurable)
Burn dividend	Split by tokens each address has sent to 0x…dEaD

Payout in BNB, USDT or the pair token. Once tax reaches 0.05% of supply, it swaps via PancakeSwap V2 on the next sell and is distributed.

Add liquidity in one click

1. **Enter the token contract**
   Pick the pair token: BNB / USDT / MITI / custom.
2. **Enter amounts**
   Quick buttons 25% / 50% / 75% / 100%.
3. **Approve & add**
   Approve the exact amount, then PancakeSwap V2 adds liquidity; LP goes to your wallet.

06 • Website • AI Logo

One-click website + AI Logo

Fill in, preview live, pay and it's online at yourname.mitipad.fun — with a ZIP download too.

Website type	Price	Platform NFT / VIP
Standard website	**0.3 BNB**	0.1 BNB
IDO website (live on-chain sale module)	**0.8 BNB**	0.5 BNB

1. **Connect**
   The paying wallet must be the token's owner or the Launch Hub project's creator.
2. **AI design (optional)**
   Describe your project and style; AI picks template, colours, effects and sections and writes the copy. Edit anything after.
3. **Template & style**
   Nova / Clean / Grid / Cyber / Meme / Guochao; hero effect, fonts, decorations and section order are yours to tune.
4. **Content**
   Logo, hero image, intro, highlights, token allocation, roadmap, socials; or "AI copy".
5. **Live preview**
   Switch between phone and desktop views.
6. **Subdomain & pay**
   Confirm the BNB payment; the site is live right away. Free edits for 30 days from the same wallet.

AI uses: AI design and AI copy share 5 uses per wallet per day; failures don't count.

AI Logo

1. **Describe it**
   2–200 characters, optional style.
2. **Pay**
   0.0001 BNB or 1,000 MITI.
3. **Pick & download**
   4 images at 1024×1024; download PNG or use as website / token avatar.

↻ Retry on failure
Up to 3 retries with the same payment.

↓ Download first
Images live on the page only; save before leaving.

07 • Basic tools

Basic tools at a glance

The everyday toolkit: balances, transfers, token checks and Mint watching.

Tool	What it does
Batch balance	BNB / WBNB / USDT and custom tokens for up to 200 wallets at once; CSV export
Token check	Paste a contract or BscScan / flap.sh link: risk items, holder concentration, LP holders & locks
Multisend	Send BNB or any token to up to 1,000 addresses in one transaction, with preview
Transfer all	Move selected tokens and BNB to one address; BNB last, gas kept
Logo maker	Name or symbol in, 6 designs out; PNG / SVG, made in your browser
Mint monitor	Live flap Mint progress, with sound / system alerts at your threshold
Mint hex	Paste a flap Mint link to get the contract, hex data and value to send
Market Cap Reader	**Free, unlimited**: price, market cap, FDV, liquidity + chart + swap

Usage

3 Free trial
3 uses per tool per wallet; 1 more per tool after MITI launches.

NFT Platform NFT
All basic tools free while you hold one.

V VIP
Unlimited during your subscription.

✓ First use
Sign once to verify your address — no transaction, no gas.

Self-service

"AVE listing info" and "DEX Screener listing info": submit logo, bio, website and socials, pay 300 USDT (BSC), and the platform submits for you; check status with your transaction hash.

08 • VIP • NFT • Assets

VIP, NFT market & my assets

VIP is priced in USD and paid in USDT or MITI. The NFT market is non-custodial: your NFT stays in your wallet while listed.

VIP subscription

$10
Monthly • 30 days

$100
Lifetime

1. **Open VIP**
   Platform → VIP, connect your wallet.
2. **Choose a plan**
   Monthly (1–24 periods) or lifetime.
3. **Approve & activate**
   Approve USDT (or MITI), tap activate, confirm.

- Create launch projects (free)
- Unlimited basic tools
- Discounted one-click website
- Monthly stacks; upgrade to lifetime anytime

NFT market

- **Buy:** pick from "For sale" and pay the listed price in BNB or MITI.
- **Sell:** list from "My NFT" with your price; moving it or revoking approval ends the listing.
- 98% to the seller, 2% platform fee; platform and all project NFTs are tradable.

My NFT

- See holdings and pending dividends; "Claim all" pays BNB.
- Dividends earned before a transfer go to the previous holder automatically.

My assets

- BNB, MITI, USDT, project tokens and NFTs in one view.
- Look up any address, add custom tokens, show USDT value.

09 • Market tools

Narratives, market cap & swap

Spot what's hot, check the numbers and swap — all on the site.

Narrative Radar

- A ticker under the notice bar on every page; tap for the full page.
- Combines hot and new on-chain pools, token movers, and public talk on X and CoinGecko trending, grouped into themes with a heat score.
- Mover rules: 1h change ⩾ 30%, or 1h volume ⩾ 3× the 6h average, or a new pool with ⩾ $10k liquidity.
- Tap a token for its chart; "Launch Hub activity" shows platform projects.

Market Cap Reader + Swap

1. **Enter a token contract**
   No wallet needed: price (BNB / USD), market cap, FDV, circulating supply and liquidity, refreshed every 60 s.
2. **Chart**
   Tap "View chart".
3. **Swap**
   Buy or sell, amount and slippage (1% / 3% / 5% / custom); check the estimate and confirm in your wallet. PancakeSwap V2, no platform fee.

Coming soon

P MITI Prediction Market
Live Opinion market odds are already on the Narrative page; how to join the MITI Prediction Market will be announced on the website.

A Activity Center
Free-entry on-chain draws, no tickets; winners drawn with Chainlink VRF and visible on chain.

10 • FAQ

Frequently asked questions

Start here if something isn't working.

Question	Answer
What is gas?	A small BNB fee for each on-chain action; signatures (like the free-trial check) cost nothing.
Wrong network?	If "not BSC" shows by your address, switch to BNB Smart Chain and refresh.
Why "Approve" first?	Paying with USDT, MITI or other tokens needs an allowance first; BNB doesn't.
Transaction failed?	Check the reason in your wallet or BscScan: low gas, low allowance, sold out, Agent ID not in this wallet.
Data loading slowly?	Tap the node dot in the top bar and switch or pin a faster node.
Tools with QR login?	QR login covers Genesis, referrer binding and NFT claim / transfer; use "Connect wallet" for everything else.
More help?	Menu → Platform → User Guide, in three languages.
